

## REDEFINED LUXURY FROM A CENTURY OF INNOVATION

## WELCOME

In our Centenary year, we are delighted to present the culmination of a Century of equipment innovation.

By understanding you and your business, and by appreciating the demands you place on equipment, our vision to transform everyday functional products into multi-functional experiences is embodied in every concept. As a result, Takara Belmont is revered globally for timeless design, superior quality and advanced technical innovation that has redefined equipment expectations, transformed service experiences and advanced the industry on a global scale.

By absorbing international fashion and interior design trends we have also created awe-inspiring salon designs that reflect the dreams and aspirations of salon owners whilst maximising service opportunities and commercial potential.

Importantly, our founding principle of exemplary service remains as crucial as ever. We never forget that together we are stronger and this partnership ethos has never been more vital to the future advancement and prosperity of our industry.

We appreciate your interest in Takara Belmont and look forward to being of service to you.

The neck cushion and head pillow are both filled with soft gel, comfortably supporting the head in three points. This perfect positioning substantially eases any strain on the neck region and helps maintain a comfortable posture during longer treatments.

#### GAP REDUCED BETWEEN BASIN & CHAIR

In order to position the backrest and neck device as close as possible, the width and incline of the front part of the basin may be adjusted in millimetres. A comfortable lying posture is achieved with a wide surface area supporting the body.

#### ROLLER BALL F

Roller Ball F is incredibly responsive. It reaches  $40^{\circ}\text{C}$  in about two minutes and halves the processing time of treatment chemicals.

Pre-programmable and adjustable settings give technicians real choice and complete control over the process. The infrared sensor maintains scalp temperature resulting in even results.

Roller Ball F does not exceed the scalp temperature at which hair becomes damaged.

The complete process achieves longer-lasting colour and perm results than alternative heat processors.

See our instructional video online:

The rotating heat elements work all the way around the head ensuring an even treatment for every client.

Pause the rotation at any time and activate selected zones of the heating element to focus processing on any one part of the head – for highlights, balayage or conditioning treatments this function is invaluable.

# MIST PROCESSORS

Our appetite for invention, innovation and technical perfection has yielded some of the world's most transformative technologies that restore, protect and preserve the integrity, health and vitality of hair.

# SCIENCE-BASED INNOVATION

#### MIST PROCESSORS

Spa Mist II and Micro Mist embody our quest for science-based innovation. Discover micro-fine mist technology that allows for the infusion of treatment ingredients, colour pigments and chemical processes for unsurpassed results without dilution or damage to the integrity of hair.

Using innovative mist technology, the absence of 'steam' ensures heat damage is eliminated. By opening the cuticle layer at low temperatures, colour pigments, treatment ingredients and other chemical processes, such as perms, are infused deeper into the hair shaft without dilution. When sealed in via the cooling features, hair health is notably improved, more glossy and silky smooth; colour is more vibrant and lasting and chemical service outcomes are more durable and resilient.

SPA MIST II

# COMPACT & MOBILE

SPA MIST II

Mobile innovation that transforms treatment, colour and chemical service expectations. For seated or reclined clients.

**Features include:** Ultrasonic technology opens the cuticle layer at 40°C allowing for the deep penetration of treatments, hair colour and other chemical service ingredients as its cool shot feature locks the cuticle and seals the ingredients in.

**The result:** Visibly enhanced shine, colour vibrancy and more enduring outcomes.

- A / 6 programmable presets and manual control
- B / Integrated water tank for multiple treatments
- C/ Smooth running wheel-base D/ Drain tank
- E / Flexible extendable hose

#### **TECHNOLOGY & INNOVATION**

Add the power of technology to TRANSFORM CLIENT EXPECTATIONS and accelerate your business. Convenient, compact, mobile processors that fit seamlessly into any salon situation.

Spa Mist II uses a soft, microscopic mist that penetrates the scalp and hair. Used with treatments such as Head Spa, Colouring, Perm or all round feel-good hair care the Spa Mist II helps you care for hair so clients leave looking and feeling beautiful. An ultrasonic transducer vibrating at 1.6 million times a second generates a fine mist of microscopic water particles. The temperature and quantity of the mist can be freely controlled and used for numerous hair treatments as well as colour processing and perms.

#### Open Mist -Warmth Creates Comfort

The mist and warmth combine to relax the client.

Allows staff to create a more luxurious shampoo experience scalp treatment.

#### Scalp Care

Open the pores to clean the scalp.

Through the mist moisturising and heating, pores open to free up keratotic plugs and debris.

With minimal burden to the scalp, debris and keratotic plugs are removed leaving the scalp cleansed.

#### Hair Care

Penetrates deep into the hair for longer-lasting effect.

Opens the cuticle layers so that the treatment particles go deep into the hair.

Cooling closes the cuticle to keep the hair healthy.

#### Colour - Even Colouring -Minimal Fading

The microscopic mist is sent into the cap where it circulates surrounding every hair strand with heat ensuring an even finish.

Cooling fixates the hair colour into the hair for longer-lasting results..

#### Perm - Beautiful Curls, Shorter Time

Uniform heating gently promotes the softening process throughout the hair.

Creates beautiful curls in minimal time.

#### Hand Care - Moist Soft Skin

Heated mist enhances the cleansing and moisturising of hands.

Brings added value to manicures and other hand care services.

#### With Open Mist

- More shampoo lather is generated and the stylists hands slide easily
- > The client gets a warm comfortable feeling right up to behind the ears

#### Without Open Mist

- Hair gradually cools resulting in less lather, and also cold lather
- > The client feels cold

## **CUSTOMISE**

# **OUR STORY**

CELEBRATING 100 YEARS

#### A CENTURY OF INNOVATION

In a Century dedicated to the advancement of hairdressing, barbering and beauty that is defined and motivated by innovation, invention and the development of cutting-edge design and manufacturing, the Takara Belmont of today is the result of seeds sown in Osaka, Japan in 1921. The technology, facilities and infrastructure may not have been available then to do what can be done today, but the vision, ambition, dedication and attention to detail were.

From the outset, Takara Belmont embarked on a voyage to define global salon experiences through innovative furniture and equipment design. It set upon a mission to create and apply new and ground breaking technologies that would elevate both the customer and stylist experience. And, it set out its intention to be the world's best - by setting benchmark standards of quality, design, functionality, performance and durability that would make, and leave, an

indelible impression on the global salon market - by shaping its future as well as defining the present.

As part of this plan, Takara Belmont would expand into international markets. It would also extend its expertise into the heart of the market through a combination of customer service principles and salon design, by building a brand and a product range around the needs, and the anticipated future demands and expectations, of salon professionals and their customers.

By drawing on international fashion and design, cultural nuances and global trends, it would perfect the art of salon design from aesthetic, atmospheric impressions to space optimisation, service range and performance, and commercial maximisation for the salon and barbershop business. It has succeeded in all of these things.

#### FROM HUMBLE BEGINNINGS TO WORLD-CLASS

From humble beginnings a bold vision emerged. Fast forward to 2021 and every ambition has been accomplished, as Takara Belmont continues to move into the future with just as much vision and ambition. The company has created some of the world's most iconic and enduring furniture and equipment designs, such as the Apollo 2 grooming chair series and the Adria II styling chair. It has developed and introduced ground-breaking technologies that have transformed hair care, treatments, chemical processes and colour with innovations like the Roller Ball F and Spa Mist II processors. It has redefined customer experiences by fusing technology and functionality with sublime luxury in the form of the Yume Series, the Legend and Maxim. It has achieved an international presence in over 100 countries and created the world's most advanced manufacturing

facilities. Furthermore, it has cultivated a service-first philosophy and product portfolio that hairdressing salons and barbershops worldwide depend on to support their business.

From high street to high-end luxury, from everyday salons and barbershops to the extraordinary, and from the unsung heroes to industry icons such as Trevor Sorbie and Daniel Galvin, Takara Belmont has shaped British and International hairdressing, barbering and beauty unlike any other equipment brand. Its ability to create products of distinction and enduring design, unrivalled performance and global appeal is unmatched, and the journey continues into the 21st Century as the company looks to build on its heritage and focus on the innovations of tomorrow.
